

# Social Skills Groups

## Building Healthy Connections

The Social Skills Group (SSG) is a clinical service that teaches and promotes appropriate interaction with peers, in a social setting. Social Skills group specifically assists children in learning various important skills such as helping them to identify appropriate boundaries and safety precautions, learning to compromise, safely interacting with peers, conflict resolution, negotiation, emotional regulation, and advocating or planning for one's future.

Groups are led by a licensed clinical therapist, with the assistance of other clinically trained professionals. Multiple groups are developed to address a variety of skills and are separated by developmental age ranges.

### Treatment Team's Role

- Ensure you and your family receive a proper assessment for most appropriate group placement
- Collaborate with your treatment team to ensure services are reflected in your treatment plan
- Address any problems you identify, during treatment
- Provide you with a thorough explanation of services and how they can help you
- Respond quickly to your calls, questions, or concerns
- Provide you with emergency contact information and a crisis plan
- Refer you to additional services, when appropriate
- Treat you with dignity and respect, at all times
